I. Net Metering

You will be able to pay electricity bill by reducing your consumed government electricity from your generated electricity. If there are excess units, it can be brought forward to future. In this system money will not be given to the customers.

2. Net Accounting

If the electricity which you generate from the solar system is higher than government electricity which you consumed those excess units will be paid Rs. 22 per unit in 1st 7th years. And also from 8th Year to 20th year you will be paid Rs.15.50 per unit. If your consumption is high the balanced amounts should be paid to government.

3. Net Plus

Government will purchase the electricity which you generate from your solar system [Rs.22](#) per unit for 1st 7 years and Rs.15.50 for 8th year to 20th year. There is no any balancing and you normally pay your electricity bill to the electricity bill.
